**ISSF WORLD CUP
RIFLE / PISTOL / SHOTGUN
RIO DE JANEIRO, BRA
13 APR – 25 APR 2016**

Rifle / Pistol Equipment

Equipment Control will be conducted according to ISSF Rules using approved, calibrated instruments. Pre-competition testing is not mandatory, however, athletes are responsible for competing with legal equipment and clothing. All athletes are urged to submit any doubtful equipment and clothing to Equipment Control for checking before the competition. All athletes are subject to being selected for random post-competition testing according to ISSF Rule 6.7.9 and will be disqualified if their equipment or clothing is not legal according to ISSF Rules.

Rifle Clothing

All rifle athletes must have ISSF seals with serial numbers on their jackets and trousers. Any rifle jackets or trousers that do not have ISSF seals must be submitted to Equipment Control for inspection and the affixing of a seal before the athlete's first competition. Jackets and trousers that were previously inspected and have an ISSF seal continue to be valid except that athletes with more than one jacket or trousers must report to Equipment Control before their first competition to confirm which jacket and which trousers they will use. All other seal numbers for that athlete will be cancelled. Athletes that wish to replace a registered jacket or trousers with a new clothing item must bring that item to Equipment Control for inspection and a new seal. Previous seals will then be cancelled. Rifle athletes can have only one active jacket and trousers at any time.

Rifle Clothing Post-Competition Testing

If one panel of a rifle jacket or trousers tests 2.9 or lower, the stiffness device must be recalibrated and the panel must be retested. If it fails again, but all other panels pass, the athlete will not be disqualified, but a written warning must be given to the athlete and the ISSF seal must be cut off. The athlete can continue using this clothing for that day in that event. If two or more panels fail, the athlete must be disqualified.

Air or CO₂ Cylinders

Please refer to ISSF Rule 6.2.4.2. that states: "It is the athlete's responsibility that any air or CO₂ cylinder is still within its validity date. This may be checked by Equipment Control."

Shotgun

Equipment Control will be conducted according to ISSF Rules using approved, calibrated instruments. Pre-competition testing is not mandatory, however, athletes are responsible for competing with legal equipment and clothing. All athletes are urged to submit any doubtful equipment and clothing to Equipment Control or the Shotgun Jury for checking before the competition. All athletes are subject to being selected for random testing during the competition according to ISSF Rule 9.4.1.1. "Athletes found to be in violation of the rules for guns or skeet marker tapes must be disqualified."

Cartridge Controls

During Qualification, athletes whose cartridges are to be tested are selected by a computer draw. 18% of the athletes participating in an event will be selected for cartridge testing. Two (2) plus four (4) cartridges will be selected from each athlete and placed in separate labeled envelopes. The two (2) cartridges must be tested, first. If they pass, the other cartridges will not be tested. If one (1) cartridge weighs 25.0 g or more, the athlete must be DSQ. If both cartridges weigh 24.6-24.9 g, the athlete must also be DSQ. If one (1) of the two (2) cartridges weighs 24.6-24.9 g, then the second envelope (with four) must be tested. If one (1) of those cartridges weighs 24.6 or more, then the athlete must be DSQ. During Finals, all six (6) finalists must be tested using the same procedure. The Finalists must bring, as early as possible, but not later than 30 minutes before the scheduled start of the Finals (Reporting Time), all the cartridges that will be used during the Finals and place them in separate Cartridge Control Boxes on the Finals field of play. The Equipment Control Jury will take the necessary samples

from the boxes. The boxes must be left under the supervision of a Shotgun Jury Member. Once ammunition is placed in the box, only the Equipment Control Jury or the Finalist can remove ammunition from the box. If additional cartridges are brought to a Finalist during Finals, samples from those cartridges must also be selected for testing. All cartridge controls must be completed before the start of the Presentation of the Finalists. Any disqualified (DSQ) athlete will not be allowed to participate in the Finals.

4. Participation

ISSF Member Federations may enter a maximum of three (3) athletes per World Cup event. Because of the limited range capacity, and the expected very high numbers of entries, the additional up to two (2) athletes to shoot “out-of-competition” are NOT permitted!

The maximum number of starts per event is the number of athlete entries that can be accepted for each ISSF World Cup event. Range capacity is determined by the available shooting time and the number of available firing points / ranges.

If the maximum number of starts is reached during the Final Entry process, a “waiting list” for that event(s) will be established. If cancellations are subsequently received, entries from the waiting list will be entered on a first come, first served basis. ISSF Headquarters and the Organizing Committee will cooperate to determine if additional entries from the waiting list can be accommodated.

Important

The set numbers listed below are the definite maximum, especially for the Shotgun events.

There are no possibilities to accept more starts!

Federations should make their entries as soon as possible to secure their participation!

Athletes without ISSF ID number will not be allowed to participate. ISSF ID numbers can be obtained from the ISSF Headquarters by using the official application form.
